

SPECIALIST FOR DATA CENTER AND END-TO-END NETWORK INFRASTRUCTURE

SPIE Network Services is a consulting and service company originating in the telecommunications sector. With our almost 100 engineers, we offer engineering, development and testing services for complex IT infrastructures, e.g., for IoT/Industry 4.0 solutions. From our roots in telecommunications and our many years of expertise in this field, we have mastered the core element of 5G campus networks and connectivity in the Internet of Things.

Our sound expertise in the field of communications technology makes us a reliable partner for the prevailing growth in digitization of industry based on the implementation of the 5G mobile communications standard. Our customer base includes well-known telecommunications and industrial companies in various sectors.

Our pool of local experts always puts us in the right place at the right time and can provide additional near-shore capacity in Europe, as required. This guarantees us maximum flexibility to optimally meet all customer requirements. We make decisions within 24 hours and can thus realize the fastest speed of response, which gives our customers clear competitive advantages over the long term.

Network engineering from 2G to 5G

- Design & planning
- Optimization & rollout
- Servicing
- Vendor & Quality Management

End-to-end network consulting

- Analysis, development and advancement of business models
- Assessment of existing infrastructures, gap and TCO analyses
- Product, innovation and requirement management

Operation of network and data center infrastructures

- Service management/incident management
- SLA & KPI Tracking
- Preventive & field line maintenance
- Service & Network Operating Center

Testlab as a Service

- Project management
- Vendor and partner management
- Test management & execution
- Environment management
- Rapid impact assessment
- Change request management

Infrastructure as a Service

- Construction, servicing and modernization of the data center infrastructure
- Securing the data center
- Provision
 - » Computing power & storage space
 - » Server/network structures & databases
 - » Virtualization environment
 - » Software

Sourcing solutions for enterprises und carriers

- As a Service
- System integrator
- Managed services

SPIE NETWORK SERVICES is part of the operational division Industry Service & Wind of SPIE Germany Switzerland Austria. Together, our specialists form a powerful, global team for high-quality industrial services in the wind, water, energy, industrial and process industry segments. We create holistic solutions from planning and realization to installation, operation and maintenance to relocation and decommissioning. We support our customers managing the challenges of digital transformation and ecological change in their industry.

SPIE Germany Switzerland Austria is the leading independent multi-technology service provider for buildings, plants and infrastructures. With our broad technical expertise and as a reliable partner, we accompany our customers into a successful future.
